EDUCATION

Ph.D. Electrical and Computer Engineering (1998)

University of California, Santa Barbara Santa Barbara, CA

- Dissertation Title: Silicon-Indium-Gallium-Arsenide Avalanche Photodetectors
- Advisor: John E. Bowers

M.S. Electrical and Computer Engineering (1996)

University of California, Santa Barbara Santa Barbara, CA

B.S. (Honors) Applied Physics (1994)

California Institute of Technology Pasadena, CA

ACADEMIC EXPERIENCE

Department Chair (2018 - Present)

Department of Electrical and Computer Engineering, Brigham Young University, Provo, UT

Associate Department Chair (2012 - 2018)

Department of Electrical and Computer Engineering, Brigham Young University, Provo, UT

- Chair Rank & Status Committee (2012 – 2018)
- Chair Faculty Hiring Committee (2012 – 2018)

Professor (2008-Present)

Department of Electrical and Computer Engineering, Brigham Young University, Provo, UT

- Teach undergraduate and graduate classes
- Supervise and guide master's and doctoral students' thesis work
- Supervise and guide undergraduate research and senior level projects
- Establish and direct Microengineering research program

Associate Professor (2002-2008)

- Department of Electrical and Computer Engineering, Brigham Young University, Provo, UT

Director of Integrated Microfabrication Laboratory (cleanroom) (2002-Present)

Brigham Young University, Provo, UT

- Manage professional staff working in laboratory
- Oversee capital equipment and supply expenditures for laboratory
- Oversee student training, documentation, and research and teaching direction for laboratory
- Laboratory is a 2500 ft², class 10 cleanroom
- Since 2002, 23 new machines or systems have been brought on-line in this facility

COURSES TAUGHT

New Student Seminar (ECEn191)* – undergraduate level

includes laboratory portion

Introduction to Circuits (ECEn212) – undergraduate level

Semiconductor Devices (ECEn450)* – undergraduate level

COURSES TAUGHT (CONT.)

- Semiconductor Devices Laboratory (ECEn452)* – undergraduate level
Capstone Advisor (ECEn475-476) – undergraduate level
Solar Lighting, Free Space Optical Communications, Lightsuits (ECEn490)* – senior project
Micro-electro-mechanical Systems (ECEn550)* – graduate level
includes laboratory portion
Optoelectronic Devices (ECEn555)* – graduate level
includes laboratory portion

* Indicates new course development

PROFESSIONAL EXPERIENCE

Co-founder and Consultant (2016 – present)

Fluxus Technologies, Santa Clara, CA

- Specialist in chip fabrication, device integration and packaging

Scientific Board Member and Co-founder (2011 – 2013)

LiquiLume Technologies, San Jose, CA

- Oversaw attempts to transfer chip fabrication to commercial foundries
- Assisted with proposal writing and pitches to venture capital firms

Consultant (2004 – 2006)

Palmar Technologies, Provo, UT

- Designed thin-film based electrodes for compact mass spectrometer
- Oversaw electrode fabrication on silicon and ceramic substrates

Staff Applications Engineer (2001 - 2002)

Intel Corporation, Calabasas, CA

- Provide technical support to networking customers for Intel's products from the optical fiber layer to the framer including TIAs, LIAs, Laser Drivers, CDRs, Mux and Demuxes, and FECs
- Perform systems and component level testing for new products including noise characterization, jitter performance, S-parameter measurements, and sensitivity measurements and predictions
- Set product specifications for next generation devices for SONET and Ethernet applications

Principle Engineer (1998 – 2001)

CIENA Corporation, Santa Barbara, CA

- Lead technical effort to bring InGaAs-Silicon avalanche photodiodes (APDs) to commercial viability at 10 Gbit/s and 2.5 Gbit/s, creating world's most sensitive optical receivers
- Hired, trained, and supervised a team of engineers and technicians to create and validate component processes, DC and RF testing procedures, package designs, and device reliability.
- Oversaw and scheduled component production utilizing \$2M annual budget

Vice President of Research and Development (1997 – 1998)

Terabit Technology Incorporated, Santa Barbara, CA

- Co-founded company based on graduate research
- Oversaw \$15M corporate acquisition of Terabit by CIENA Corporation
- Built semiconductor cleanroom and procured processing and testing equipment with \$2M capital equipment budget

- Fabricated prototype APDs for commercial applications using wafer fusion and standard silicon and III-V processing including implantation, CVD, RIE, RTA, zinc diffusion, SOG application, SEM, and AFM

Graduate Student Researcher (1994 – 1997)

University of California, Santa Barbara, Santa Barbara, CA

- Reported world record gain-bandwidth-product for optical detector
- Invented technique of InGaAs to silicon wafer fusion

Undergraduate Research Assistant (1992 – 1993)

Los Alamos National Laboratory, Los Alamos, NM

- Worked in hydrodynamics testing group modeling X-ray production from large radiographic machines

Teaching Assistant (1993 – 1994)

Applied Physics Department, California Institute of Technology, Pasadena, CA

- Graded, conducted recitations, and supervised labs for undergraduate optics class

Undergraduate Research Assistant (1991 – 1992)

Chemistry Department, California Institute of Technology, Pasadena, CA

- Assisted with time-of-flight mass spectrometry experiments

HONORS AND AWARDS

- BYU University Professor (2016 – present)
- Institute of Electrical and Electronics Engineers (IEEE) Fellow (2016)
- Optical Society of America Fellow (2015)
- BYU Sponsored Research Achievement Award (2014)
- Engineering and Technology Endowed Chair (2012 – 2015)
- BYU Electrical Engineering Department Outstanding Faculty Award, 2011
- BYU Electrical Engineering Department Outstanding Faculty Teaching Award, 2011
- BYU Karl G. Maeser Research and Creative Arts Award, 2010
- BYU College of Engineering, Excellence in Scholarship Award, 2005
- IEEE Senior Member, 2004
- Intel Division Award, 2002
- UCSB Chancellor's Fellowship, 1994-1995
- Caltech ARCS Scholar, 1992-1994
- Robert C. Byrd Scholarship from state of New Mexico
- High school valedictorian

Undergraduate Research Programs

IMMERSE Program

Together with Prof. Stephen Schultz of BYU's Electrical and Computer Engineering Department, I initiated the Intensive Mentoring and Micro-Electronic Research for Students in Engineering (IMMERSE) program in 2003. Its goal is to prepare students for entry into top tier graduate programs and provide them an opportunity to author or co-author a technical paper. The program has grown to include approximately 50 undergraduate students and 8 faculty advisors annually. Students in the program receive one-on-one training by faculty and senior students and are assigned to an independent project. Students are offered full time employment in the summer and part time employment during the school year. Funding is provided by an existing BYU mentoring program, the MICRON Foundation, ORCA and department funds, and through external research grants.

IMMERSE Highlights:

- 320 Students employed since 2003
- > 80% of students have authored or co-authored a technical paper
- > 75% of students have pursued graduate degrees

ORCA Scholarships

BYU's Office of Research and Creative Activities (ORCA) provides \$1800 scholarships for undergraduate students to conduct independent research projects. Students write proposals and conduct the projects with the assistance of a faculty advisor. To date, I have advised 22 of these ORCA scholarship projects.

Web Based Reference Tools

An effort was begun in 2003 to provide on-line instructions for the tools in BYU's cleanroom facility, the Integrated Microfabrication Laboratory. This work rapidly expanded to include basic reference information on semiconductors, microfabrication, and equipment operation, including tutorials and interactive calculators and graphs. This information is now contained at the following website: www.ee.byu.edu/cleanroom and contains over 250 separate pages of information. The site receives around 90,000 hits per month from external visitors who use it as an essential reference. A companion site was launched in 2005 dedicated to providing reference information on photonics topics: www.ee.byu.edu/photonics. This site contains over 100 separate pages and receives 50,000 hits per month from external visitors. Prof. Stephen Schultz and I oversee the continued expansion and improvement of these two sites. Most of the HTML coding is done by students participating in our IMMERSE program.

Laboratory Director

Since 2002 I have directed the Integrated Microfabrication Laboratory, a 2500 ft² class 10 cleanroom. This facility is open for use by all BYU faculty and students and provides a significant resource for researchers in the micro and nanotechnology fields. I have had oversight of fundraising, lab budgets, student training and admission, equipment removal and installation, lab procedures, and staff activities. Since my arrival, >30 new systems have been installed, dramatically improving the labs capabilities. The number of lab users has also significantly increased. Current registered users total >130, with approximately 60 of those coming from the Electrical and Computer Engineering Department. It is estimated that the laboratory currently supports research projects with total external funding levels of \$3 Million per year.
